New Opportunity!!!

The Fisk University Materials Science and Applications Group in the Department of Life and Physical Sciences is announcing the availability of

4-year scholarships

of $12,500.00 each, per year, for incoming freshman, Physics major interested in the areas of Astronomy or Space Science

This scholarship will supplement the Financial Aid award from Fisk Admissions Office and can cover most if not all the cost of college attendance.

The program provides the opportunity for students to work closely with faculty, postdocs, and other students on research projects in physics and other related areas, like astronomy, astrophysics, and astro-materials.

Students will have the opportunity to participate in Research Experiences for Undergraduates Summer Programs at Vanderbilt, Fisk, and other partner institutions, like NASA centers and Dept. of Energy National Laboratories. These are 10-week internships for rising sophomores, juniors, and seniors. Students have access to cutting-edge research facilities, working on forefront research projects in related fields, including: astronomy, astrophysics, cosmology, Biological physics, Condensed Matter, Atomic, Molecular, Optical, and Nanoscale physics, Experimental particle physics, High-energy experimental nuclear physics, Theoretical nuclear and computational physics. They also participate in social events and field trips, and special workshops and seminars with a strong emphasis on preparing for success in graduate school.

The successful candidates will be considered for the Pre-Bridge track, with commitment to continue in the Fisk/Vanderbilt Master’s-to-PhD Bridge Program at the graduate level.

To apply, please send High School GPA, ACT /SAT scores, three letters of Recommendation and personal statement to ccoca@fisk.edu.

U.S. Citizenship or permanent resident status required.
