New Graduate Opportunity for yourself or others!!!

The Materials Science and Applications Group in the Department of Life and Physical Sciences is announcing:

Two Summer internships at Lawrence Livermore National Laboratory

The research is primarily in the area of Radiation Detector Measurements and Development Technologies. Experiments conducted at LLNL may become be part of the Master’s Thesis and result in joint publications.

This internship is for 9-10 weeks, participants earn $18.00 per hour, a total of $720.00 for a 40 hours week. It also pays for housing, and airfare from Nashville to Livermore, California and back.

Michael Williams and Korressa Williams were past participants, you may want to ask for their feedback on their experience. Past participants cannot reapply. U.S. Citizenship required.

To apply, please contact Maggie at mzlibut@fisk.edu, or Consi at: ccoca@fisk.edu.
